

School of IT and Waurn Ponds Visitor Knowledge Base

Compact local reference for a fast voice agent

Purpose. Use this document for common, stable questions. Keep spoken answers to one or two sentences. Use web search only when information is current, location-specific, uncertain or not covered here.

Fast-response rules for the agent

- Answer the question directly; do not recite background unless asked.
- Retrieve one relevant entry first. Avoid sending the entire document to the voice model.
- For courses, give the course name, code, broad focus and normal location only.
- Use web search for current fees, entry requirements, application dates, unit availability, staff availability, events, opening hours, transport, parking prices and temporary closures.
- When local retrieval is insufficient, say: "Let me look that up online."
- Do not read citations, URLs or this document title aloud.

Common questions about Deakin

What is Deakin University?

Deakin is a Victorian public university established in 1974. Its first campus was established at Waurn Ponds, and the university is named after former Australian Prime Minister Alfred Deakin. [1]

Where are Deakin's main campuses?

Deakin's main Australian campuses are Melbourne Burwood, Geelong Waurn Ponds, Geelong Waterfront and Warrnambool. Deakin also delivers many courses online. [2]

How does the academic year work?

Deakin uses three trimesters. Most full-time students normally study in Trimester 1 and Trimester 2, usually taking four credit points in each. [3]

What is a unit or credit point?

Most Deakin units are worth one credit point. A typical three-year bachelor degree contains 24 credit points, although exact course rules differ. [3]

Where should a future student ask about applying? **WEB LOOKUP**

Domestic future students can call 1800 693 888. International future students can call +61 3 9918 9188. Current entry requirements, fees and application dates should always be checked online. [4]

School of Information Technology

What does the School of Information Technology teach?

The School covers areas including programming, software development, artificial intelligence, data science, cyber security, networking, cloud computing, robotics, virtual reality and user experience design. [5]

Where should a School of IT visitor go at Waurn Ponds?

Building KA is the main starting point for many Faculty of Science, Engineering and Built Environment activities. Confirm the exact room or event location with the host or current campus map. [6]

Who can answer detailed School of IT questions?

The School of Information Technology contact number is +61 3 9244 6699. For course planning or enrolment questions, use Student Central. [5]

Courses commonly relevant at Waurm Ponds

Course information rule. The list below is a concise orientation guide, not a formal course plan. Locations, intakes, course structures and unit availability can change; verify the current course page or Handbook before giving precise advice.

Course	Code	Length	Normal locations	What it covers
Bachelor of Information Technology	S326	3 years	Waurm Ponds, Burwood, Online	Broad IT: programming, web, cloud, networking, cyber security, design and projects.
Bachelor of Cyber Security	S334	3 years	Waurm Ponds, Burwood, Online	Network security, forensics, secure coding, malware analysis and ethical hacking.
Bachelor of Cyber Security (Honours)	S434	4 years	Waurm Ponds, Burwood, Online	Cyber security degree plus advanced study and a final research component.
Bachelor of Information Technology (Honours)	S470	1 year	Waurm Ponds, Burwood, Online	Supervised research year for high-performing IT graduates.
Bachelor of Arts / Bachelor of Information Technology	D310	4 years	Waurm Ponds, Burwood, Online	Combines broad arts study with an IT qualification.
Bachelor of Criminology / Bachelor of Cyber Security	D380	4 years	Waurm Ponds, Burwood, Online	Combines cyber security with crime, behaviour and justice studies.
Master of Applied Artificial Intelligence	S736	Up to 2 years	Waurm Ponds, Online	Machine learning, deep learning, reinforcement learning, NLP, robotics and AI projects.
Master of Cyber Security	S734	Up to 2 years	Waurm Ponds, Online	Security systems, forensics, analytics, governance and professional projects.

Other major School of IT undergraduate courses

Does Deakin offer Artificial Intelligence?

Yes. The Bachelor of Artificial Intelligence, S308, focuses on AI software, machine learning, deep learning, reinforcement learning, natural language processing, robotics, computer vision and speech processing. In the 2026 guide it is listed at Burwood and Online rather than Waurm Ponds. [3]

Does Deakin offer Computer Science?

Yes. The Bachelor of Computer Science, S306, covers programming, algorithms, computer systems, data, computational intelligence and areas such as robotics or Internet of Things. In the 2026 guide it is listed at Burwood and Online. [3]

Does Deakin offer Data Science?

Yes. The Bachelor of Data Science, S379, covers data analysis, statistics, machine learning, artificial intelligence and predictive analytics. In the 2026 guide it is listed at Burwood and Online. [3]

Does Deakin offer Software Engineering? [WEB LOOKUP](#)

Yes. The Bachelor of Software Engineering (Honours), S464, develops software design, development, testing, project and engineering skills. Check the current course page for location and intake. [3]

Common course questions

Which course is the broadest option at Waurm Ponds?

The Bachelor of Information Technology is the broadest IT option. It allows study across software, cloud, networking, cyber security, interaction design and other specialisations. [7]

Which course is best for artificial intelligence at Waurm Ponds?

For postgraduate study, the Master of Applied Artificial Intelligence is offered at Waurm Ponds. The specialised undergraduate Bachelor of Artificial Intelligence is normally based at Burwood or Online in the 2026 guide. [3,8]

Which course is best for cyber security at Waurm Ponds?

The Bachelor of Cyber Security, Bachelor of Cyber Security (Honours) and Master of Cyber Security are the main specialist cyber security options offered at Waurm Ponds. [3,9]

Representative units and topics

Important. These are representative examples for answering general questions. Do not use this list to prescribe a student's enrolment or claim that a unit is available in a particular trimester.

Area	Representative units or topics
Programming and software	SIT102 Introduction to Programming; SIT232 Object-Oriented Development; SIT217 Introduction to Software Engineering; SIT120 Introduction to Responsive Web Apps.
Computer systems and networks	SIT111 Computer Systems; SIT202 Computer Networks and Communication; networking and cloud study through majors, minors and postgraduate units.
Data and artificial intelligence	SIT112 Introduction to Data Science and Artificial Intelligence; SIT215 Computational Intelligence; SIT720 Machine Learning; SIT744 Deep Learning; SIT796 Reinforcement Learning.
Language, vision and robotics	SIT770 Natural Language Processing; SIT789 Robotics, Computer Vision and Speech Processing; AI study also includes mathematical modelling and data analysis.
Cyber security	SIT182 Real World Practices for Cyber Security; SIT282 Computer Forensics and Investigations; SIT218 Secure Coding; SIT324 Malware Analysis; SIT379 Ethical Hacking.
Professional and project work	SIT223 Professional Practice in Information Technology; SIT374 Team Project A; SIT378 Team Project B; SIT306 IT Placements and Industry Experience.
User and organisational design	SIT216 User Centred Design; SIT224 Information Technology Systems and Innovation; SIT328 Communicating Information Technology Projects; SIT335 Strategic Integration of Artificial Intelligence.

What students commonly learn

- How to program, test and maintain software.
- How computers, databases, networks and cloud systems work.
- How to analyse data and build machine-learning or AI systems.
- How to investigate and protect systems from cyber threats.
- How to design technology around user needs.
- How to work in teams, manage projects and communicate with clients or industry partners.

Facilities and practical learning

What IT facilities are available?

Deakin provides fully equipped computer learning spaces and specialist facilities involving cyber security, networking, data science, robotics, artificial intelligence, virtual reality and software development. Exact lab locations and visitor access should be confirmed. [5,10]

Can a visitor enter a lab?

Not automatically. Teaching rooms and specialist labs may require staff approval, a Deakin card or an organised tour. Visitors should follow their host's instructions. [6]

Do IT students get practical experience?

Yes. IT courses use projects, capstones and work-integrated learning. The Bachelor of Information Technology includes professional practice and project options, including industry experience. [7,11]

Are the courses professionally accredited? [WEB LOOKUP](#)

Several major IT and cyber security courses are professionally accredited by the Australian Computer Society. Confirm the exact accreditation on the current course page. [3,7,9]

Can students undertake research? [WEB LOOKUP](#)

Yes. Honours courses, research projects, masters by research and PhD pathways are available. Research topics, supervisors and vacancies change, so search the current School or research-degree pages. [5]

Waurn Ponds visitor essentials

Question / need	Local answer	Source
Campus address	75 Pigdons Road, Waurn Ponds, Victoria 3216.	12
School of IT starting point	Building KA; confirm the exact room with the host or current map.	6
Student Central	Building JB, Level 2; general student administration and course enquiries.	13
Library	Building JC; check current opening and visitor-access hours online.	14
Guest Wi-Fi	Choose "Guest WiFi Deakin", open a browser and self-register. Visitors from participating institutions may use eduroam.	15
Public transport	Waurn Ponds is the closest train station; buses connect the station, Geelong and the campus. Use live journey planning for times.	16
Parking	Most parking requires a current permit or payment. Limited free Park and Go bays may be available in Car Park 3; check signs and current rules.	16
Accessibility	Accessible parking, paths, lifts and toilets are available. Use the mobility map for a specific route.	17
Security	Deakin Security is available 24/7 on 1800 062 579.	18
Emergency	For an immediate threat to life call 000 first, then contact Deakin Security.	18

Questions that should trigger web search

- What courses, majors, units or intakes are available this year or trimester?
- What are the current fees, scholarships, entry requirements or application deadlines?
- Is a particular staff member, lecturer, researcher or supervisor available?
- Where is today's class, meeting, seminar, tour or event?
- What are today's library, Student Central, cafe or building opening hours?
- What is the current parking price, permit rule, car-park availability or infringement process?
- What is the next bus or train, or are there delays or disruptions?
- Is a particular lab, room or specialised facility open to this visitor?
- Are there construction works, closures, emergency alerts or temporary relocations?

Fallback response. "I do not have that exact information locally. Let me look that up online."
